

# 5000 & 5073 PolyUrea

## 2 Component Poly Urea

Versatile Building Products 100% solids PolyUrea 5000 and 73% solids Polyurea 5073 use an amazing new technology in the urethane arena. 5000 is 100 percent solids and allows film thickness to build in excess of standard systems with water clarity and mirror smoothness. The cross linking of the film in the cure makes it exceptionally tough and durable, maintaining its gloss far beyond that of comparable systems. The chemistry is based on polyurea and much attention has been given to the application characteristics in its formulary. As a result, Poly Urea 5000 & 5073 are extremely user friendly without having sacrificed the performance of the finished product. Because 5000 is non flammable and has a very mild odor we expect it to be the product of choice when working in and around areas where an offensive odor is an issue.

5073 is formulated using the same technology as the 5000. We have reduced the solids and viscosity down to levels comparable to a high solids CRU. The benefits 5073 has over the 5000 is that it is easier to install, has more pot life, cures to a hard film faster and is suitable for exterior exposure without yellowing. Use 5073 when you need a faster turn around time. The applications for these products are almost limitless; from the high end residential applications to retail settings with high traffic requirements or food service areas where stain resistance and clean ability are paramount as well as light industrial.

### Features and Advantages:

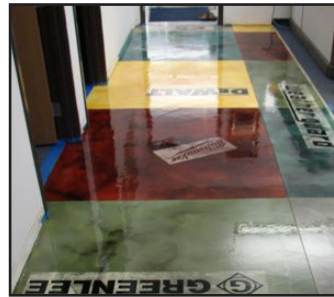

- ☑ 5000 is 100% Solids, Zero VOC
- ☑ 5073 is 73% Solids, 50 VOC
- ☑ Low odor
- ☑ High gloss
- ☑ High build
- ☑ Good resistance to most chemicals
- ☑ 5073 is Non Yellowing
- ☑ Will cure at temperatures just above freezing

Used as a sealer over a stained floor where nearby foot traffic prevented the use of a solvenated product. Installed by Surface Solutions

Used over a decorative concrete surface. Installed by Richard Smith Concrete

Extreme high gloss provides a mirror like finish. Installed by Coluor.

### Uses:

- ✓ Retail floors
- ✓ Industrial floors
- ✓ Any concrete floor
- ✓ Most Previously Coated Floors – consult with manufacturer
